Startup Instructions

1. Enter your stream keys in the Stream Keys section.
2. Start the outputs you want:
 - Normally: start YouTube A (or whichever YouTube matches the key entered).
 - Normally: start Radio Dodra 2 (this is the default channel).
 - For multiple outputs: put both YouTube keys in Stream Keys and start both YouTube outputs.
 - If using Radio Dodra 1, start that instead of Radio Dodra 2 (you usually don't need both).
3. After the stream starts, set the Radio Dodra title in the metadata section.
4. Logs will begin showing once streams are running.

Troubleshooting

1. If a stream stops or fails, stop it in the dashboard and restart the output.
2. If your internet goes down, wait until it comes back up. Restart OBS only, not the entire dashboard.
3. If streams still don't work after restarting outputs, contact Harnoor Singh for help.
